Context

Nearly 75% of people who are blind in Guatemala suffer from preventable or curable causes. There are an estimated 2 million people with vision loss. Of these, 94,000 people are blind.

Seva’s Approach in Guatemala

Seva’s main partner in Guatemala since 2006 is Visualiza Clínica Médica Oftalmológica, known simply as Visualiza. Founded in 1997, the hospital has a unique community-oriented low cost and free service system. They provide private care alongside free vision services for their low-income patients.

With two hospitals and one new surgical center, Visualiza is able to work in both Guatemala City as well as in the rural, northern region of the country, called the Peten. Although Visualiza employs only 2% of the nation’s ophthalmologists, the organization performs over 20% of all cataract surgeries in the country.

Seva’s approach to addressing eye health needs in Guatemala prioritize three key strategies; Access to universal eye care, building Capacity of personnel and infrastructure as well as Evidence-based interventions and advocacy.

Access to Primary eye care services. Visualiza and Seva support eye care delivery through vision centers that address up to 80% of eye care needs on the spot and refer patients with more complex eye care needs to the hospital. Community promoters provide screenings and door-to-door visits in remote communities as well as distribution of educational materials and radio announcements.

Modern Technology for patient care is vital in supporting up to date practices implemented locally. Seva supports Visualiza’s robust electronic medical record system to ensure effective follow up with patients and to alert patients of upcoming eye care needs.

Seva, in partnership with Visualiza continues to expand the ever-growing network of partner hospitals and institutions in the region by determining readiness and ability of additional mentees to join the GSI network with our Guatemalan partner Visualiza acting as the mentor. By establishing the first Eyexcel Training Program for Latin America, our Guatemalan partner was able to adapt training practices for Allied Ophthalmic Personnel (AOPs). As a result, Visualiza has achieved substantial growth within its own institution as well as expansion to assist other eye care institutions in Guatemala and Central and South America.

Evaluation of performance including personnel, financial sustainability, cost recovery, outreach practices, productivity and quality/efficiency of service delivery are all assessed and tracked.

Spotlight on Building Capacity

In partnership with Visualiza, “Guatemala Brillando” or “Brighter Guatemala” is a first-of-its-kind plan to systematically eliminate avoidable blindness throughout Guatemala. We are positioned to achieve it in just 10 years and the blueprint can be scaled across the world. Within these 10 years, Guatemala Brillando is estimated to develop 30 Vision Centers (VC) and 5 eye hospitals across the country. Today, there are 10 Vision Centers and plans to open a new hospital in the Quiché region.
